Greenova PLAST

NEXT GEN PVC LAMINATES

GREENOVA PLAST is a premier manufacturer of high-quality **uPVC Modular Furniture** and **PVC Laminates** in India.

As part of the esteemed group of companies under **Maa Panel India Pvt. Ltd.**, GREENOVA PLAST benefits from a rich legacy of innovation and excellence. Maa Panel India Pvt. Ltd. is renowned for manufacturing aluminum composite panels under the **MAPL** brand, while **Telko Extrusion** is a leader in the extrusion industry.

This strong foundation enables GREENOVA PLAST to deliver **PVC Laminates** that are durable, eco-friendly, and aesthetically appealing, meeting the diverse needs of both residential and commercial spaces.

Our range of **PVC Laminates** is known for exceptional durability, superior performance, and exquisite visual appeal, making them an ideal choice for contemporary interior applications.

OUR PRODUCT CATALOGUE

uPVC Modular Furniture

Rafter & Louvers

What Makes Greenova Different

Crafted with advanced technology, these laminates offer exceptional durability and resilience. They provide complete protection against moisture, pests, and surface damage. Their robust structure ensures stability even in demanding conditions. Enhancing interiors with a seamless blend of strength and elegance.

Waterproof

Resistant to moisture, making it ideal for wet and humid areas.

Fire Retardant

Designed to slow down flame spread for added safety.

90° Bendable

Flexible construction for creative design possibilities.

Eco-Friendly

Non-toxic and environmentally responsible material.

Anti-Termite

Protected against termites and pests for long-lasting performance.

Color Core

Uniform color throughout for a seamless appearance.

Durable

Durable and sturdy for long-term use.

Recyclable

Make a positive impact through smart recycling habits

Easy to Clean

Low maintenance surface that wipes clean effortlessly

1.25 & 1.5mm Thickness

1.25 & 1.5mm thickness for superior durability and strength.

Redefining Surfaces with Strength & Elegance

Crafted with precision and driven by innovation, GREENOVA PVC Laminates bring a new standard to modern interior surfaces. Designed to deliver exceptional durability and refined aesthetics, our PVC Laminates are the perfect solution for both residential and commercial applications.

With advanced manufacturing capabilities and a strong legacy under Maa Panel India Pvt. Ltd., every PVC Laminate reflects quality, reliability, and performance. Our PVC Laminates are engineered to withstand moisture, termites, and daily wear while maintaining their flawless finish over time.

Blending functionality with contemporary design, GREENOVA PVC Laminates offer a seamless balance of strength, sustainability, and style—transforming ordinary spaces into extraordinary environments.

Clean the surface gently. Do not use harsh acidic cleaners or sharp, abrasive tools like wire brushes.

Keep the sheets away from direct sunlight or constant bright light, which can fade the colors over time due to UV rays.

Take extra care during vertical installations; make sure to apply even pressure across the sheet to stop bubbles from getting trapped.

To avoid cracks near corners and cuts, make sure you properly condition the material, use correct bonding techniques, and plan your layout carefully.

Any issues related to air bubbles are not covered under our claims policy.

Claims will be rejected if cracking is caused by L-shaped cuts or groove cutting.

- **HIGHLY DURABLE** Greenova PVC Laminates are engineered for superior durability, offering a longer service life compared to conventional laminate sheets.
- **CRACK RESISTANT** Unlike traditional Laminates, Greenova PVC Laminates are highly resistant to cracking after installation, ensuring long-lasting performance.
- **UNICOLOR CORE** Greenova PVC Laminates feature a unicolor core, creating seamless edges that blend perfectly with the surface, unlike laminates where edge lines remain visible.
- **WATER PROOF** The waterproof PVC core makes Greenova Laminates ideal for moisture-prone areas such as kitchens, bathrooms, and other wet environments.
- **HIGHLY FLEXIBLE** Designed with excellent flexibility and strength, Greenova PVC Laminates are easy to transport and handle, significantly reducing the risk of breakage or damage during transit.
- **LESS ADHESIVE** Greenova PVC Laminates require approximately 25% less adhesive (Fevicol) during installation compared to Fevicol used in HPL sheets, helping optimize material usage while maintaining overall cost efficiency.

Highly Flexible **Crack Free** **Color Core** **Waterproof**

CUSTOMIZED SIZES CAN BE DEVELOPED ON REQUEST:

NOTE: Greenova PVC Laminates are designed and manufactured to deliver reliable performance under normal usage conditions. All products are warranted against manufacturing defects. Any liability arising from a genuine manufacturing defect shall be limited to the value of the product only. Slight colour variations may occur from batch to batch due to the manufacturing process. Catalogue samples are provided as a reference for design, colour, and finish, and may not accurately represent the actual thickness of the laminate.

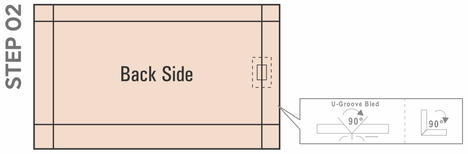

90° BENDING PROCESS IN PVC LAMINATES

STEP 01

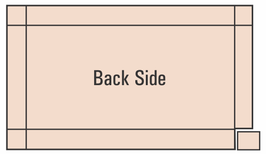

Cut your sheet as per your desired size and shape.

STEP 02

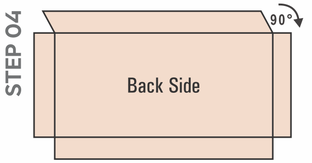

Use a V-groove cutter (available easily in the market) to mark a groove on the sheet.

STEP 03

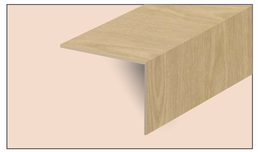

Next, use a regular pair of scissors to trim the edges out.

STEP 04

Place the sheet front up and use the groove marks to bend the sheet towards the outside.

STEP 05

Now your sheet is ready to be used.

LET'S SAVE THE WORLD TOGETHER

Diamond Cutter Blade

We strongly advise exclusively utilizing diamond cutter blades for all cutting, routing, and drilling operations. To prevent burr formation during the cutting process, it is essential to maintain blade sharpness. For final finishing, a smooth file may be employed to soften and refine all corner edges.

Router Blade

For the precise bending of Greenova PVC laminates, it is required to employ a 4" x 8 mm x 6 Tee Radius C-groove blade. To achieve optimal results, maintain a routing depth of 0.8 mm and a minimum width of 5 mm. Once properly routed, the material will seamlessly accommodate bends of up to 90°

TECHNICAL SPECIFICATION

Greenova PLAST

Thickness
1.2 mm (±10%)

Sheet Size
8'x4' Feet (2440mm x 1220mm)

Wild Range
Our Lamination come in wide range of colors designs.

Adhesive to be used
For Superior results. We recommend Special Adhesive for PVC Laminates. These Laminates are easy to apply with all normally used with plastic Laminates such as water based and solvent based adhesive, We do not recommend use heat activated adhesive.

Cutting and Machining
Greenova PVC Laminate can be cut, router and drilled with most standard Wood working tools or equipments, all blades must be sharp, to remove any burrs that may occur in the cutting process, we recommend the use of a smooth, file to feather all corner Edges.

Lamination
Proper substrates must be used and careful bonding procedures must be observed Substrates should be of good quality plywood, high density particle board or high quality fiber board. The face of the substrate must be smooth and free of grease, wax, dust, chips and other foreign matter.

Bending and forming
Greenova PVC Laminate can be bent and all radius bending should be handled in the same manner as all grades of non post forming decorative Laminates.

Uses
When used on other type of horizontal surfaces they should be protected with glass or any other equivalent material. They can be used for kitchens, cabinetry, columns, ceiling, furniture, doors and also for commercial use wherever a modern contemporary look is desired.

Care and Maintenance
Micro fiber clothes can be used for cleaning the surface after pre soaking. Surface should not be cleaned using a dry cloth. No scouring or abrasive cleaning material must be used since these will damage the brilliance of the surface gloss. Window cleaners, thinners, acetone, ammonia or other aggressive chemicals should not be used for cleaning.

KINDLY REMOVE THE PROTECTIVE FILM AFTER 15 DAYS OF INSTALLATION OF LAMINATES.

PRODUCT CONSISTENCY | 90° BEND | TERMITE, BORER, FUNGUS RESISTANCE | QUALITY DOUBLE CHECKED | EASY TO CLEAN | ECO FRIENDLY | CLIMATE STABILITY
